WORK EXPERIENCE

Associate Software Developer

TalentQuest Solution Pvt Ltd.

📅 10/2019 - Ongoing 📍 Bangalore, India

TalentQuest is a company that provides a comprehensive talent management system that empowers companies to effectively select, manage, develop and retain top talent.

- I have worked on the enhancement of an internal application that is developed in Angular 4. This application is being used to track the work progress status of each team.
- I have created the doughnut chart to display the bugs count based on the priority by fetching the data from VSTS.
- I have also worked on the data export in different formats using both client and server side technologies.
- I got a chance to work with the Kendo grid and SSRS report since these things are widely used in our application.
- I also got a chance to work with Entity Framework as well as Database where I have written several Stored procedures and SQL functions based on the requirements.

Trainee Software Developer

TalentQuest Solution Pvt Ltd.

📅 10/2018 - 10/2019 📍 Bangalore, India

TalentQuest is a company that provides a tools for talent management.

- I got a chance to learn a lot of new technologies which are being used in the actual development of the product.
- I have also improved my Problem solving skills, Coding standards and Time management during my training period.
- After completion of the training period, I got a chance to work on Product Support Request Items which was very helpful to understand the Application architecture and flow of the program.

PERSONAL PROJECTS

Online Student Fee Management System

📅 12/2016 - 04/2017

🔗 <https://github.com/akkyyakhilesh/JavaRepobyAkki/tree/master/FeeManagement>

Domain- Information System

Technology- Java(JDBC, Servlets, JSP), HTML, CSS, JavaScript

Database- Oracle 11g Server

Modules- 4

My Role- Developed DAO class and Servlets

- Through this project, Our motive is to show the differences between the old fee system and the Online fee management system.
- The new system is totally computerized and data can be easily maintained in database for a long time.
